

Reason For Fish Dead

- **New Tank Syndrome:** It is a state due to new tank, filters, decoration, add beneficial bacteria medicine.
- **Chlorine:** Tap water may contain Chlorine and Chloramine, to neutralize use anti chlorine.
- **Aquarium Gears:** Check condition of air pump, heaters, lights & filters.
- **Poor Water Condition:** Clean filters every week, it is recommended to replace 25 percentage of water by weekly, full cleaning in bimonthly, removes nitrites & ammonia & sudden changes in PH.
- **Over stock:** fish pop makes pollutants at level high, creates ammonia in aquarium. Chance of fighting each other.
- **Over Feeding:** Feed fish food which they can eat in 2-minute, uneaten food converts to ammonia highly toxic for fish.
- **Disease:** observe fish health, movement, feeding.
- **Tank Mates:** Choose appropriate tank mates, chance fishes quarrel each other.
